

### PSG303

#### ProxLock Tag Simulator

The Tag Simulator is an extremely simple "Programming Device" that allows adding and deleting proximity card/tag numbers from ProxLock and ProxSwitch readers when a tag is lost or not available.

One Tag Simulator can be utilised at different sites but for security reasons it will operate only in conjunction with the Master Tag.

Compatible with PSG501 KeyTag and PSG502 ISO Card

## Tag Simulator Operating Instructions

**On/Off** - Hold button down to operate the unit.  
Release button to switch unit off.

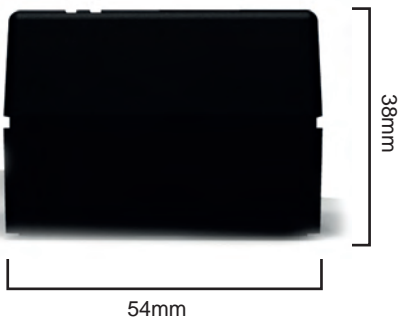

**➡** - Shift Cursor from left to right.

**⬆** - Set individual digits

**Send** - Transmit number to the ProxLock.

**NOTE:** Adding or deleting Tags/Cards from ProxLock can only be performed in conjunction with the System Master Tag.
